PORTABLE USB DJ MIXER + SCRATCH CONTROLLER + DJ SOFTWARE

DJ-Tech's i-Mix is a DJ software controller for DJs who yearn for the control they left behind when they switched from a traditional mixer to the multi-processing power of laptop DJ-ing

- i-Mix is a fully class-compliant USB MIDI device and is the ultimate tool for any performing computer DJ seeking total control of their software.
- i.Mix's 48 buttons, 10 knobs and 5 faders send MIDI data from the controller to your DJ software of choice, making the inconvenience of mouse or glide-pad software control a thing of the past. No assignment of software parameters are needed
- Simply connect the controller to a computer with a USB cable, enable it in your DJ software's configuration screen, and watch the virtual controls respond to i-Mix's actions. The i-Mix comes packaged with **Mix Vibes 3DEX LE software**
